MyQ gives you the opportunity to do more with your time.

(1.) Perfect experience

We live in a world of personalization, where quicker, better, easier and safer are key to creating a perfect experience and where proof and justification take a prominent role in any procurement process.

(2.) To get more done within the same amount of time

In recent years people's expectations and demands have increased, wanting to get more done within the same amount of time, creating additional unnecessary stresses and strains within a business environment.

(3.) The very latest in print communication technology

At MyQ, we recognize that time is the most important asset we have, and have taken that belief through into developing the very latest in print communication technology.
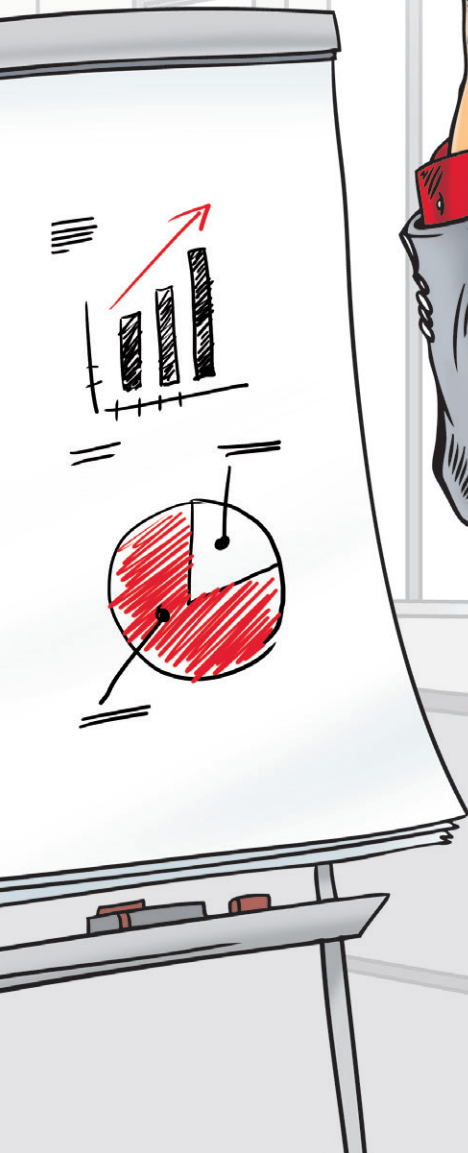

Who will benefit:

- **Marketing teams** will be excited by unique brand and messaging features.

- **CEOs** will love the visibility of a transparent group landscape.

- **IT teams** will see an instant benefit from network stability and speed of information.

- **HR departments** will have confidence in user management and security features.

- **FDs** will love the simplicity of cost monitoring and account reporting.

- **Managers** will understand how much time is saved through personalization.

WE BELIEVE SATISFIED USERS WILL HELP YOU GET AHEAD OF THE COMPETITION.

REDUCED PAPERWORK, SIMPLIFIED OPERATION, CLEAR RULES AND ACCURATE REPORTS WILL SAVE A LOT OF MONEY, VALUABLE TIME AND HELP THE ENVIRONMENT.

Accelerate the return on investment.

Correct decisions have to be based on precise information. Before buying printing devices you need to know who prints what, when and why. After the purchase, it is necessary to keep the costs within set limits. MyQ will answer all your questions through nearly 100 reports at the right time.

Prevent misuse of sensitive data.

In each company, success is accompanied by higher demand for internal documents. We will always make sure that your confidential production plans, payslips or ready-made commercial offers can be accessed by authorised personnel only.

Increase efficiency and staff satisfaction.

More restrictions and a vast number of work rules do not necessarily lead to the best performance. To achieve this, people need to know they are appreciated and that they can focus on what they do best. That it is why a simplified operation by reducing paperwork is part of our highest priority.

Protect the environment.

Growth, savings, and responsibilities are the three pillars of each manager. MyQ will support development of your business, save employee time, and prevent unnecessary wastage, decreasing paper consumption and waste production.

WE BELIEVE THERE ARE MORE IMPORTANT ACTIVITIES THAN STANDING AT A PRINTER.

MYQ ONLY OFFERS FUNCTIONS YOU PERSONALLY NEED. WITH A SINGLE CLICK, YOU CAN EASILY PERFORM OPERATIONS THAT USED TO BE DIFFICULT IN THE PAST.

Understand each and every copier.

People speak different languages and have different needs. Copiers differ as well - by their functions and control. So, we decided to change it. We unified the control, translating it to more than 30 languages. We enabled flexible functionality, for individual requirements.

Get freedom of movement.

It doesn't matter if you are in your own office, your branch office or meeting a colleague. You can comfortably print documents at every printer or multifunctional device from your PC, tablet or mobile phone. It is equally easy to make a copy or send a scan to your mailbox, folder or an electronic archive.

Complete your tasks anywhere, anytime.

Murphy's Law applies to everyone, especially when you least need it. If there is something wrong with your copier, the system will alert you before it can damage your work. You can simply go to the next unoccupied device and finish your work there.

Secure your documents.

You no longer have to be afraid of someone reading the content of your documents. Before printing your tasks, you will identify yourself by entering a password, using your contactless card or your smartphone.

WE BELIEVE YOU FIND EVERYTHING YOU NEED IN A GOOD SYSTEM.

PERFECTION IS NOT REALISING THAT YOUR MACHINE IS RUNNING... IMAGINE WHAT YOU CAN NOW DO WITH ALL THAT SPARE TIME?

Remove unnecessary administration.

We are obsessed with automating and simplifying complex things. Therefore you will no longer need to create reports, order consumables, keep their stocks, monitor and report a maintenance issue or find the right service provider.

Improve your printing environment.

Higher availability of services at a lower number of printing devices - a dream that can finally turn into reality. Pull printing, mobile print or offline cache ensures a print job is printed on any available device, saving money, time and effort.

Reduce operating expenses.

Rules and quotas will help you to keep your print volume under control. And private printouts? It's up to you, if you eliminate them all, or you "sell" them to employees as part of a corporate benefits package, together with your HR.

Simplify deployment and maintenance.

Installation and setup within a few minutes, automatic search, remote installation and setup of printing devices has never been so easy. Thanks to our flexible licensing you can constantly respond to the changing requirements.

Device Management

- Alert Monitoring
- Automated Device Finder
- Automatic Driver Installation
- EFI Fiery Monitoring
- MyQ Smart Print Services
- Network Device Monitoring
- Remote Installing & Configuration
- Support of SNMP v1, v2 & v3
- Auto Discovery of Printing Devices
- Direct Change Passwords on Embedded Terminals
- Terminal Actions per Device/User

System Management

- Green Reports
- Filtering Reports via SQL Queries
- Report Filter Values in Header
- Audit Log
- MS CLuster Support
- Credit, Quota & Vouchers
- Customizable Pop-Up User Notifications
- Customizable Reports & Dashboard
- Database Backup & Restore
- Task Scheduler & Event Notifications
- Full Web Access
- LD AP Connectors
- MS Azure Active Directory Support
- Payment Gateways PayPal, WebPay & API
- Private User, Group, Project & Device Based Accounting
- VM Clustered Environment Supported
- Discounts for Individual Printing, Copying, Scanning, & Faxing
- MyQ Easy Config with Cache & Temp Cleanup
- Automated Code Books: Permissions per Item/User

Print Management

- Client Spooling
- Job Roaming with Delegate Printing
- Device Spooling
- Direct Print
- Failover Printing
- Job Compression, Modification, Parsing, Preview & Roaming
- Printing Rules, Rights & Quota Offset Definition
- Pull/Secure Print
